

STUDENT IPAD TIPS

1

KEEP IT COVERED

Keeping the iPad in the provided case is the best way to protect it. iPads broken outside the case are not covered by insurance!

2

CHARGE AT HOME

Make sure you don't lose your charging cable and block. Leave it home and charge the iPad overnight.

3

APPLY YOUR UPDATES

Many iPad problems that are reported to the IT department can be easily fixed by updating the operating system or the apps.

4

HELP YOURSELF TO APPS

The District provides all students with the apps they need. If you don't see an app you need, check out the Self-Service app to get it.

5

APP OVERLOAD

You don't need every app in Self-Service. Only load the apps you need to save space in your iPad. You can always load an app when you need it.

6

MISPLACED YOUR IPAD

If you have misplaced your iPad, you can use the Find My iPhone feature at www.icloud.com to help you find it.

7

BROKEN IPAD

If you accidentally broke your iPad or it is malfunctioning, bring it to IT for help. We will either fix it or replace it for you.

8

FORGOTTEN PASSCODE

Locked out of your device because you forgot your passcode? IT can help you clear that code.

9

IPAD IS FULL

Oh no you are out of space? Try deleting apps you don't use or getting rid of some of those old selfies. Apps and pics can take up a lot of space.

10

BACKUP YOUR IPAD

Make sure your iPad is backing itself up. You don't want to lose your data if your iPad breaks or is lost. Turn on backup in your settings today.
